

SOLIDWORKS-BASED INDUSTRIAL EQUIPMENT AND WATER-TREATMENT DESIGN PORTFOLIO

Equipment Models, Engineering Drawings, P&IDs and Process-Flow Documentation

Selected professional design work prepared using SolidWorks and engineering drafting tools

PORTFOLIO CONTENTS

This portfolio presents selected industrial equipment, chemical-storage and water-treatment design work. SolidWorks was used for three-dimensional equipment modelling, assembly development and engineering drawing preparation. Process flow diagrams and P&IDs are included to demonstrate system-level design and documentation experience.

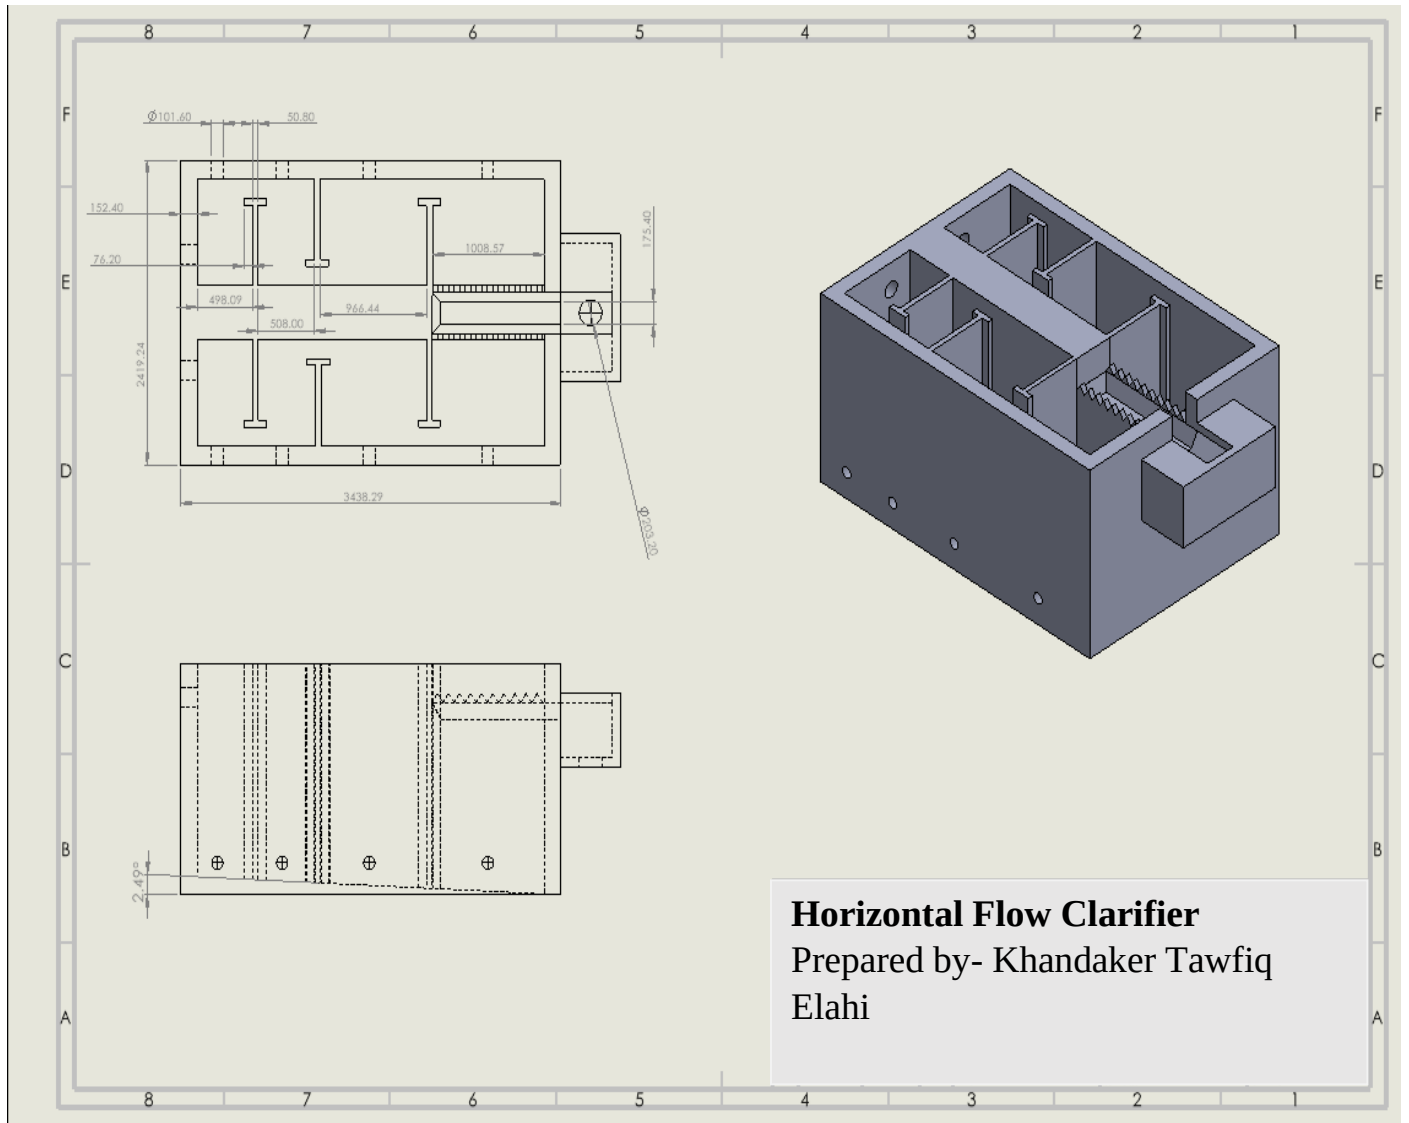

No.	Design Item	Page
1	Final Assembly of Sulfuric Acid Tank	3
2	Sulfuric Acid Tank P&ID with Drain Line	4
3	Sulfuric Acid Tank with Shade	5
4	Horizontal Flow Clarifier	6
5	Vertical Flow Clarifier	7
6	Vertical Flow Clarifier P&ID	8
7	KPCL Water-Treatment Process Flow Diagram	9
8	General Water-Treatment Process Flow Diagram	10
9	Media Filter and Ion-Exchange Regeneration Diagram	11
10	Decarbonizer (Degasifier) Process Diagram	12

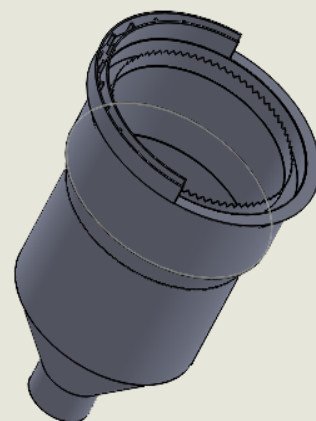

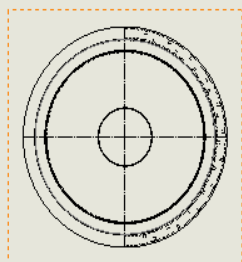

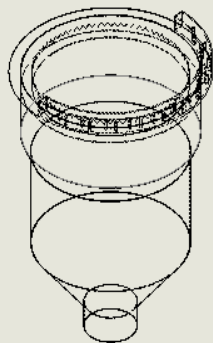

Confidentiality and sharing note

Before public distribution, confirm that plant-specific identifiers, dimensions, capacities, client information and proprietary details are authorised for external sharing. Where necessary, use anonymised versions of the drawings.
